LOGFRAME, POLICE-COMMUNITY DIALOGUE AND COMMUNITY SAFETY IN PUNTLAND, 515-708

	Intervention Logic	Objectively verifiable Indicators of achievement	Means of verification	Assumptions
Overall Objective	To contribute to the security and stabilisation of fragile parts of Puntland by improving community safety and security provision for the beneficiaries in target locations.	25% increase in the number of men and women in target communities and districts who consider security to have improved in their community 25% increase in the number of men and women in target communities and districts who declare higher levels of trust in security providers 25% increase in the number of conflicts reported by to have been peacefully managed in target communities and districts by the newly established Guurti		
Immediate Objective(s)	1. Communities implement their own safety projects (specific projects to be determined by the communities subject to their local priorities and capacity)	50 % target communities implement at least 1 of the activities in their Community Safety Plan Safety projects implemented by communities can be demonstrated through qualitative methods to have improved local safety and security	DDG CSP activity tracking tool Activity evaluations by DDG M&E Team through observation and interviews	The security situation remains stable and allows free access to beneficiaries and implementation of activities DDG are still able to recruit, train and retain skilled staff
	2. Improved access to accountable and responsive security provision for community members in target locations	Increase of 50% survey participants who express familiarity with their security providers (Defined e.g. as meeting the security providers (e.g. police) Improved responsiveness of security providers to complaints as perceived by community members in 50% of the target communities At least 1 case in each community where security providers and community members cooperate to achieve a common goal	Baseline / Endline Survey Focus Group Discussion, Interviews, Observation and case examples of security providers responding to complaints Outcome tracking	There is no negative interference or actions from government or external actors Communities continue to actively welcome the programme and remain fully engaged in the activities NA
	3. Gurtiis identify and responds to conflicts and newly developed xeer is adopted by community members	3.1. The Gurtiis identify local drivers of conflict and ways to respond to them	Conflict analysis and outcome tracking Perception assessments	Communities are accepting of the Gurtii and willing to cooperate

		3.2. 50% increase in people that are aware of the new established Xeer for target locations		NA
Outputs	1. Conflict sensitive and inclusive Community Safety Plans prepared in target communities and endorsed by local authorities	Community Safety Plans are developed in each target community through an inclusive process with reference to conflict analysis All Community Safety Plans are endorsed by local authorities	Plans/documents are written and printed in both Somali and English Participant lists / meeting records	Communities are willing and able to engage in developing their own safety plan NA
	2. Target communities have a functioning mechanism for dialogue with the security providers in place	At least 4 dialogue meetings between the community and security providers are facilitated in each of the target communities over the course of the project At least 2 agreements between security providers and communities on how to cooperate and achieve a common goal	Participant lists Action point tracking	Communities perceive the need for this activity and are willing to include it in their Community Safety Plans NA
	3. Establishing representative Gurtii composed of elders, women, youth etc., endorsed by the local community and district and government	3.1. Establishments of one Gurtii which are representative of various social groups in target locations 3.2. Creation of one Xeer for each district centre 3.3. Provision of one training package covering aspects of conflict resolution and related themes	Participant lists Xeer Participant lists	Communities perceive the need for this training and are willing to include it in their Community Safety Plans N/A N/A
